DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks (pages 11 and 12), filed 7/8/2004, with respect to claims 1-28 have been fully considered and are persuasive. The rejections of claims 1-28 have been withdrawn.

Drawings

2. The drawings were received on 7/8/2004. These drawings are acceptable.

3. Claims 1-29 are allowed.

4. The following is an examiner's statement of reasons for allowance:

* The Amendment filed on 7/8/2004 has overcome the rejection of claims 1-28;

* The present invention provides a new method and apparatus for providing a composite data signal with successive logical values so as to reduce the real-time computational requirements for embedding copy protect data into digital or analog content (specification, page 3, lines 10-16).

Particularly, the new method and apparatus comprise the following features, which the prior art taken either singly or in combination does not teach:

- pre-processing a first copy of data segments to provide at least corresponding pre-processed segment with embedded information representing

a first logical value; pre-processing a second copy of said data segments to provide at least second corresponding pre-processed segments with information representing a second logical value that is different than said first logical value; and assembling at least particular ones of said first and second pre-processed segments in accordance with a control signal that designates the successive logical values, to provide said composite data signal (see independent claims 1 and 27-29).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
